Plum 360™ Infusion System Best in KLAS

Recognised by KLAS Research as the Top Performing Traditional and EMR-Integrated Smart Pump

This is the sixth year in a row the Plum 360 has been awarded Best in KLAS, with 2018, 2019, and 2020 awards for top performing Smart Pump, 2021 and 2022 awards for Smart Pump EMR-Integrated, and for 2023, the first pump to be awarded both the traditional Smart Pump and EMR-Integrated awards. The “Best in KLAS” designation is based on feedback from thousands of healthcare providers and results from in depth side-by-side comparisons of IV smart pump performance in multiple categories including culture, loyalty, operations, product, relationship, and value. Achieving the #1 Best in KLAS ranking from the first time the Plum 360 was eligible, to a sixth consecutive award is a testament to the excellent performance, impact of a continually advancing platform, and customer satisfaction for the Plum 360.

“One of the outcomes of using the Plum 360 is the integration. We can send orders from the electronic record to the pump and then send the data back from the pump into the EMR. Instead of having to look at the pump and transcribe orders and information into the EMR, we just click some buttons in the EMR, and the information goes out from the EMR to the pump, and then the pump sends the data back to the EMR. The Plum 360 simplifies the data collection. I think we have received our money’s worth.

— Director, Jun 2022

“The safety features of the Plum 360 stand out to me. Our previous devices had free flow issues. With the Plum 360, we have well-designed cassettes. The pumps are innovative and well designed. I don’t have to worry about safety.

— Director, Aug 2022

“ICU Medical has been very responsive with regard to some additional expansion and work to standardize disparate libraries between our different sites. They have done a really good job of supporting that.

— VP/Other Executive, Nov 2022

“The Plum 360s are workhorse pumps. They are built to last.

— Director, Nov 2022

“For the implementation, we were given a dedicated team of people who were trained and skilled. The vendor was very engaged throughout the whole implementation and was always available to address questions or issues. The vendor was all hands on deck for the implementation, and that was great. The initial training was very thorough.

— Manager, Aug 2022
