Where IV meets IT

The Fresenius Kabi Connected Infusion System

Agilia Connect is the new infusion system giving you control from your Fresenius Kabi Centerium server.

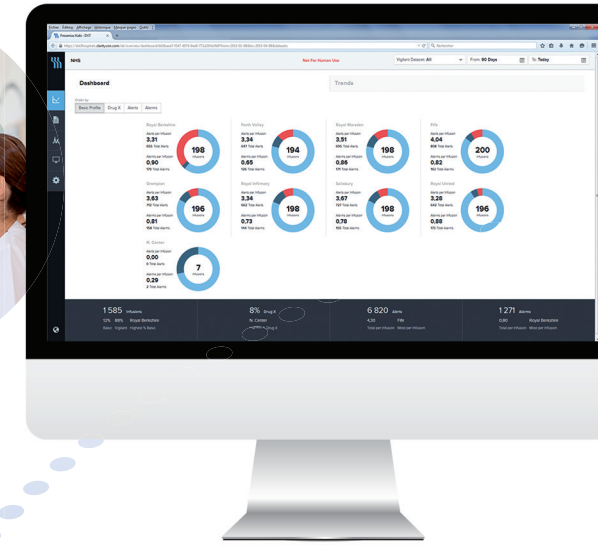

Powered by **Vigilant Software Suite**, you can securely and remotely configure, monitor and update your infusion fleet.

Vigilant Software Suite: Intuitive, powerful and secured control

QUALITY IMPROVEMENT **Vigilant Insight**

- Compliant with hospital safety rules
- Optimises drug and device usage in all clinical environments
- Reduces operational costs and leverage investment

SAFETY **Vigilant Drug'Lib**

- Fast drug libraries creation and updates
- Multiple clinical environment and practices
- Intuitive interface with embedded help

Easy to use, robust, flexible ... and now Wi-Fi connected throughout the hospital

SECURED DATA MANAGEMENT Centerium

- Easy drug and fleet management
- Simple integration with hospital IT systems
- Latest cyber communication standards
