Go Disposable Slings

Clip Attachment

Go Disposable Slings have been designed as patient specific and used until the carer deems it is no longer fit for purpose. This means with one sling for one patient, you can minimise the risk of cross infection. The comfort or safety of the patient however has not been compromised.

The **Go Disposable Sling** is an enhanced technical equivalent to other sling offerings as it includes our **V-Comfort**

design which makes the patient experience more comfortable.

The **V-Comfort** design disperses the load behind the leg more evenly than a single strap, thus avoiding high pressure points on the back of the leg.

When you change to **Go Disposable Slings**, you will not have to retrain your team on assessing which size of sling to use for each patient as the

size of the slings matches other commonly used slings. The advantage of changing to **Go Disposable Slings** is a more comfortable sling for the patient at a more economical price.

The Go Disposable Sling range is designed for Arjo-style clip fixings.
