Cuddle

The friendly children's bed

▲ Height and mattress base can be electrically adjusted with the control box. The box is safely stored in a lockable compartment at the foot end.

◀ Cuddle is suitable for children up to 115 cm tall.

The bed for an anxiety-free recovery

Cuddle protects and supports small patients

The electrically adjustable children's bed Cuddle was specially developed for the strict regulations for paediatric wards, particularly with regard to the safety of young patients. Its smooth inner surfaces ensure that the children do not bump into protruding parts or use them to pull themselves up. While the patients are well protected, they enjoy a clear view into the room through the safety sides made of acrylic glass or aluminium laths. In addition, the shape of the chassis with centrally brakeable castors ensures perfect stability – even with uneven loads or restless children.

- **Oval slots** in the panels of the head and footboard allow the passage of monitoring cables, drainages and supply lines.
- A design with few niches allows **easy cleaning** of the bed.
- Three **cheerful colours** are available to match the plastic elements of the bed to any interior design.

▲ The acrylic glass panels of the head and footboards can be easily removed by hand after unlocking the outer knob.

▲ With a damped mechanism, the safety sides can be lowered quickly and safely.
