3. Clinical information management
4. Decision support
- 5. Life cycle solutions**

LIFE CYCLE MANAGEMENT FOR SUSTAINABLE WORKPLACE EFFICIENCY

To help you optimize your medical device performance and cost efficiency, we offer individualized service and preventive maintenance programs, accessories and consumables, regular software and hardware updates, and personnel training programs. We provide a complete range of customized solutions designed to protect your hospital's investments. By keeping your devices up and running and your team up to date on the latest functions and features, life cycle management from Dräger can help you maximize performance and quality of care.

1. Service solutions from a single source

- We develop and manufacture our medical devices. No one is more qualified to maintain and service them than Dräger.
- We offer a complete selection of service contracts tailored to your needs: from standard inspection to preventive care or even to complete life cycle management.
- Remote service solutions provide you with efficient online diagnostics, troubleshooting and preventative maintenance options.
- For maintenance and repair, we use only original replacement parts.
- Dräger Service is available around the globe by phone, on the Web or at hundreds of locations in more than 180 countries.

2. Accessories meeting the highest quality standards

- Dräger accessories have been developed for the use with our medical devices, such as our anaesthesia, respiratory care, patient monitoring, or thermoregulation therapy devices.
- Our accessories are specified and manufactured according to the highest quality standards to provide safe operation and excellent performance.
- A complete range of both disposable and reusable accessories for use on the ICU, in the OR, in neonatal care, in the emergency department, and on regular wards.
- RFID technology automatically transfers settings between ventilators or anaesthesia devices, minimizing the risk of connection errors while reminding personnel of component exchange intervals.

D-23755-2009

3. Updates and upgrades

- Through regular software updates, we keep your devices at the forefront of modern medical technology. Updates can be performed annually or biannually, both on-site and remotely.
- Software upgrades expand the performance spectrum of your devices by including new therapeutic functions. You have the option to add new functionality in a continuous upgrade path, step by step.
- Continuous update and upgrade path for your clinical information management systems.

D-30015-2011

4. Dräger training and education programs

- Comprehensive device and application training for your team can be provided by the Dräger Academy – either on-site or in one of our many authorized training facilities around the world.
- Qualified operation in combination with standardized user interfaces helps reduce the possibility of user errors and allows for flexible working schedules.
- A perfect platform to learn from the latest clinical developments; it enables interaction with peer groups and the building of valuable relationships around the world.
