

Workplace design in the hospital

COMPLETE SOLUTIONS

1. Workplace design

2. Medical devices
3. Clinical information management
4. Decision support
5. Life cycle solutions

WORKPLACE DESIGN FOR A COMFORTABLE WORKING ATMOSPHERE AND IMPROVED PROCESS EFFICIENCY

We are experienced in providing ergonomic hospital workplace designs for more than 50 years. By combining our workflow knowledge with our product and service portfolio, we offer hospitals customised packages encompassing consulting services for planners and architects, gas supply system design, clinical workplace design, medical device integration and clinical information network systems.

1. Advanced technology for more efficiency in the OR

- We offer custom-built workplace solutions for the modern OR environment.
- High-quality anesthesia workspace solutions are designed to support standard, advanced and state-of-the-art applications.
- Integrated systems solutions with rapid device docking and mobile medical device racks enable enhanced workplace ergonomics and process efficiency.
- Our illumination solutions deliver quality light for surgical applications and can easily be combined with our high-performance video solutions.
- Through global partnerships, we can provide complete hybrid operating room design solutions.

2. A healing environment for the ICU

- Our advanced workplace design philosophy focuses on creating a healing environment for the patient, as well as providing the best support for your staff.
- We develop and integrate state-of-the-art ventilation and patient monitoring solutions for the ICU.
- Integrated patient lifting systems, noise monitoring, lighting packages, and customised colour concepts translate into improved ergonomics and comfort.
- Our supply unit and accessory portfolio includes efficient space-saving solutions.

MT-1724-2008

3. Mastering complex challenges in the emergency department

- Advanced workplace design concepts can help you streamline your workflow and let you stay in control even when patient throughput is at its highest.
- Our portfolio is flexible and modular, allowing for the optimal balancing of standardization and individualization of therapy.
- Dedicated accessories help you maintain a high degree of flexibility and compatibility.

D-27706-2009

4. Workplace design for the special needs of neonatal care

- Our neonatal workplace concepts are aligned with the latest developmental care practices designed to support patients, parents, and caregivers.
- Customized solutions provide enhanced hygiene and improved ergonomics for caregivers, helping to support infection control guidelines and workload distribution.
- Stress and noise reduction concepts, appropriate lighting, as well as space for parents to remain in close contact with their baby, are central elements of our solutions.

MT-7508-2004

5. Customised infrastructure solutions for maximum safety

- The safe and efficient delivery of medical gases and other media to the patient's bed is an essential prerequisite for effective acute care.
- We offer consulting services for every phase of the process: from initial concept stages, to design, project management, installation, certification, service, and maintenance.
- Our gas management ensures maximum safety; highly redundant design elements reduce the possibility of major supply interruption.
- Advanced alarm management keeps you informed of issues should they arise.
